APPLICATION BRANCH

Dear Sir:

With regard to the above-identified patent application, the applicant respectfully responds to the Notice to File Missing Parts of Application and makes a preliminary amendment and citation of publications enclosed herewith in connection with the above-identified case.

In the Specification:

The applicant respectfully requests the following modifications to be made to the patent application:

Page 2, line 36, delete "experimentors" and insert
--experimenters--.

Page 15, line 28, delete "Paszknowski" and insert --Paszkowski--.

Page 19, line 20, delete "outline" and insert therefor

Remarks

In response to the Notice to File Missing Parts mailed January 13, 1987 with regard to the above identified patent application, the applicant wishes to submit to the Office, and encloses herewith, a fully executed copy of the application signed by the inventor with an appropriate Declaration.

The applicant also respectfully requests the Examiner to make the minor changes and modifications, and insert the accession number, as indicated in the above changes to the text of the application.

In addition, the applicant wishes to bring to the Examiner's attention the following publications.

Copies of all of the above publications are enclosed herewith for the Examiner's review. All of these publications are specifically mentioned in the text of the application. Some, as referred to in the "Background of the Invention" portion of the specification are referred to for general background in the technology. The other references cited in the specification of the application are included to make it clear regarding experimental details well known to those of ordinary skill in the art.

The applicant respectfully requests the Examiner to consider these references in evaluating the patentability of the subject matter claimed by the applicant here.

Therefore the applicant respectfully requests examination on the

merits of this patent application.

Respectfully submitted,
